

# You Are Invited

As an important member of the embedded community **Connect Tech Inc.** invites you to join us at the Real-Time & Embedded Computing Conference in **Santa Clara, CA** on **January 26, 2010**. As our special guest you will be hosted to a free technical conference, exhibition, and even lunch.

[Register Today](#) to reserve your space.

## About Your Host Company

For 25 years, Connect Tech has built a solid reputation for expertise in professional design, unsurpassed technical support and innovative products for the industrial, automation, medical, military and aerospace industries.

Our products include:

- FPGA & Digital I/O Products
- Solid State Drives
- Multi-port Serial Cards
- Ethernet-to-Serial Devices
- CAN Controller Cards
- Wireless Radio Modems
- Engineering Tools

## Product Showcase

**Connect Tech's FreeForm/PCI-104 Virtex-5 Based FPGA Module**

*Rapidly move through all design stages, reduce development costs, and maximize your ROI*

**Xilinx Virtex-5**  
Virtex-5 LX30T, LX50T or FX30T

- 8MB flash
- 128 MB DDR2-400 memory
- Up to 5 million logic gates
- MicroBlaze™ technology
- PowerPC option

## What You'll get out of RTECC:

### Education

Our technical conference sessions will give you the latest information on growing and emerging technologies. Leading companies bring you their technical experts to discuss a wide range of technologies.

### Personal Relationships

Take this unique opportunity to talk face-to-face with experts integrating a wide range of products into projects every day. Our exhibition offers you the time to ask questions, compare technologies and weigh your options. Leave with the contacts necessary for answering all your technical questions and learn about new breakthrough business solutions.

### Comparison Shopping

Have the confidence you're choosing the best. The Real-Time & Embedded Computing Conference is designed for you to compare vendors side by side.
